## INTRODUCTION

The Marion County Transportation Improvement Program (TIP) lists the anticipated projects throughout Marion County for the next five years. Types of projects are Capacity, Rehabilitation, Intersections and other miscellaneous maintenance such as guardrail, sidewalks, striping, etc. Activities undertaken on these projects usually include survey, design, right-of-way acquisition, and construction.

The TIP is revised on an annual basis prior to the budget completion. Every year the project costs and schedules are updated. Also, the five-year time frame is revised to reflect the addition of the new fiscal year and the new projects for that year.

The selection of all the projects listed in the TIP is based on information from the prior TIP, the Office of the County Engineer, Growth Services, and the Transportation Planning Organization (TPO) Long Range Plan. Rehabilitation projects, intersection improvement projects, and turn lanes are identified by the Office of the County Engineer. Construction of new lanes and new roads are identified by the Office of the County Engineer based on the TPO's approved Long Range Plan.

After staff at the Office of the County Engineer identifies the projects, a schedule is prepared according to the availability of funds over the five-year period. This schedule is then presented to the Board of County Commissioners for adoption.

## PHASE CODES

The following codes are used to identify each phase of the project from start to finish.

<b>Code</b>	<b>Phase Information</b>
PER	Preliminary Engineering Report
DES	Design
ROW	Right-of-Way
CST	Construction

## FUNDING CODES

The following codes are used to identify how each phase of the project is funded.

<b>Code</b>	<b>Fund Information</b>
GT	80% Gas Tax Construction (BM761541)
